N. J. R.

War Department,
United States Engineer Office,
Cincinnati, Ohio, May 26, 1913.

Having compiled on an eight-hour basis a daily wage scale comprising 93 tables and containing approximately 30,000 calculations, I hereby grant to the United States the right to print and use the same in the Government service without liability.

Walter Wales Parker. [seal.]

Witness:
R. R. Jones,
Cincinnati, Ohio.

266077

DIRECTIONS FOR USING TABLES.

To find the amount due at a daily rate of pay, ascertain the number of days that service was rendered, turn to the rate paid, and opposite the number of days for which payment is due will be found the amount. If the service rendered includes a fraction of a day the amount due will be found by continuing across the table to the column headed with the proper fraction.

For example, to find the amount due for 26⅜ days, at $1.60 per day, turn to the table bearing that rate, run the eye down the column headed "Days" until you find 26 and across to the column headed "⅜," and you find the amount, $42.20.

To find the amount due at an hourly rate, ascertain the number of hours that service was rendered, turn to the rate paid, and opposite the number of hours for which payment is due will be found the amount. If the column headed "Hours" does not give the exact number, continue across the table from the nearest number to the fraction of a day necessary to equal the full number.

For example, to find the amount due for 151 hours, at 19 cents per hour, turn to the table bearing that rate, run the eye down the column headed "Hours" to the nearest number, which is 144, and across to the column headed "⅞," which is the 7 hours necessary to make 151, and you find the amount, $28.69.

To find the amount due at a daily rate of pay when time of employment is kept by the hour (particularly useful in field service): "A" works 239 hours at $1.52 per day. How many days of 8 hours has he worked, and what amount is due him? Turn to the table bearing this rate, run the eye down the column headed "Hours" until you find 232; this, as shown in the next column headed "Days," equals 29 days; cross the table to the column headed with the fraction "⅞," which is the 7 hours required to make the 239. This at once shows that 239 hours equals 29⅞ days of 8 hours, and at the rate of $1.52 per day the amount due is $45.41.

$0.64 PER DAY. [1/4 hour, 2 c.; 1/2 hour, 4 c.; 3/4 hour, 6 c.] **8 c. PER HOUR.**
